Official Product	HT Part No. HT-261USD/UYG	Your Part No.		Data Sheet No.
Tentative Product	*****	*****		HDS-261-B475
Specifications are subject to changes for improvement without advance notice. Proprietary data, drawings, and company confidential all rights reserved.		Jun-07, 2006	Version of 1.0	Page 2/13

Introduction

- *The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by HARVATEK for any infringements of intellectual property or other rights of the third parties which may result from its use.*
- *Harvatek is continually effort to improve the quality of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing HARVATEK products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such HARVATEK products cause loss of human life, bodily injury or damage to property.*
- *The HARVATEK products listed in this document are intended for usage in general electronics (computer, personal equipment, office equipment, industrial robotics, domestic, etc...) These products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction.*
- *In developing your designs, please ensure that HARVATEK products are used within the specified operating ranges as set forth in the most recent HARVATEK product specifications.*
- *Also, please keep in mind the precautions stated in this document.*

Official Product	HT Part No. HT-261USD/UYG	Your Part No.		Data Sheet No.
Tentative Product	*****	*****		HDS-261-B475
Specifications are subject to changes for improvement without advance notice. Proprietary data, drawings, and company confidential all rights reserved.		Jun-07, 2006	Version of 1.0	Page 3/13

Product Specification

	Specification	Material	Quantity
Iv	USD: 28.5 mcd above UYG: 18 mcd above @20mA/ Ta= 25° C Tolerance±10%		
Lambda (λ _D)	USD: 615-635 nm UYG: 570-577 nm @20mA/ Ta= 25° C Tolerance±0.5nm		
Vf	USD: 1.6-2.4V UYG: 1.6-2.4V @20mA/ Ta= 25° C		
Ir	HT standard		
Resin	Milky Diffused	Epoxy resin	
Carrier tape	According to EIA 481-1A specs	Transparent tape	4000pcs per reel
Reel	According to EIA 481-1A specs	Plastic/ White	
Label	HT standard	Paper	
Packing bag	220x240mm	Aluminum laminated bag/ no-zipper	One reel one bag
Carton	HT standard	Paper	Non-specified

Others:

Every small-box will be loaded 5 reels. These 5 reels can be different in lot, Iv, lambda, or Vf. Every reel will have an independent label to identify its specification and the small-box there will have a corresponding label post on it.

ATTENTION: Electricstatic Discharge (ESD) protection

The symbol shown on the page herein to introduce 'Electro-Optical Characteristics'. ESD protection for GaP and AlGaAs based chips is still necessary even though they are safe in low static-electric discharge. Material in AlInGaP, GaN, or/and InGaN based chips are **STATIC**

SENSITIVE devices. ESD protection has to considered and taken in the initial design stage.

If manual work/process is needed, please ensure the device is well protective from ESD during all the process.

ESD HBM 1KV

Dry Pack

Any SMD optical device, like this chip LED, is **MOISTURE SENSITIVE device**. Avoid absorbing moisture at any time during transportation or storage. Every reel will be packaged in the moisture barrier anti-static bag (Specific bag material will depend upon customers' requirement or option). And the bag is well sealed before shipment.

By customer's requirement, we will put a humidity indicator in each moisture barrier anti-static bag before shipment.

The package is the following:

Storage

It's recommended to store the products in the following conditions:

Humidity: 60 %RH Max.

Temperature: 5 °C ~30 °C (41°F~86 °F)

- 1 Shelf life in sealed bag: 12 month at <math> < 40 \text{ }^\circ\text{C}</math> and <math> < 90\% \text{RH}</math>. (Base on aluminum laminated moisture barrier bag.)
- 2 After the bag is opened, devices that will be subjected to infrared reflow, vapor-phase reflow, or equivalent processing must be:
 - 2.1 Mounted within 72 hours at factory conditions of $\leq 30 \text{ }^\circ\text{C} / 60\% \text{RH}$, or
 - 2.2 Stored at $\leq 20\% \text{RH}$ with zip-lock sealed.

Baking

It's recommended to bake before soldering once the pack is unsealed open & re-sealed after 72 hours. The conditions are as followings:

$60 \pm 3 \text{ }^\circ\text{C} \times (12 \sim 24 \text{hrs})$ and <math> < 5\% \text{RH}</math>, taped reel type

$100 \pm 3 \text{ }^\circ\text{C} \times (45 \text{min} \sim 1 \text{hr})$, bulk type

$130 \pm 3 \text{ }^\circ\text{C} \times (15 \sim 30 \text{min})$, bulk type

Soldering

Manual soldering (We do not recommend this method strongly.)

Soldering wire: 63/37 Sn/Pb, flux contained.

To prevent cracking, please bake before manual soldering, if the device is subject to moisture.

Temperature at tip of soldering tool : 300 °C ± 5 °C Max. (25W)

It's banned to load any stress on the resin during soldering.

Soldering time : 3 ± 1 sec

Reflow Soldering

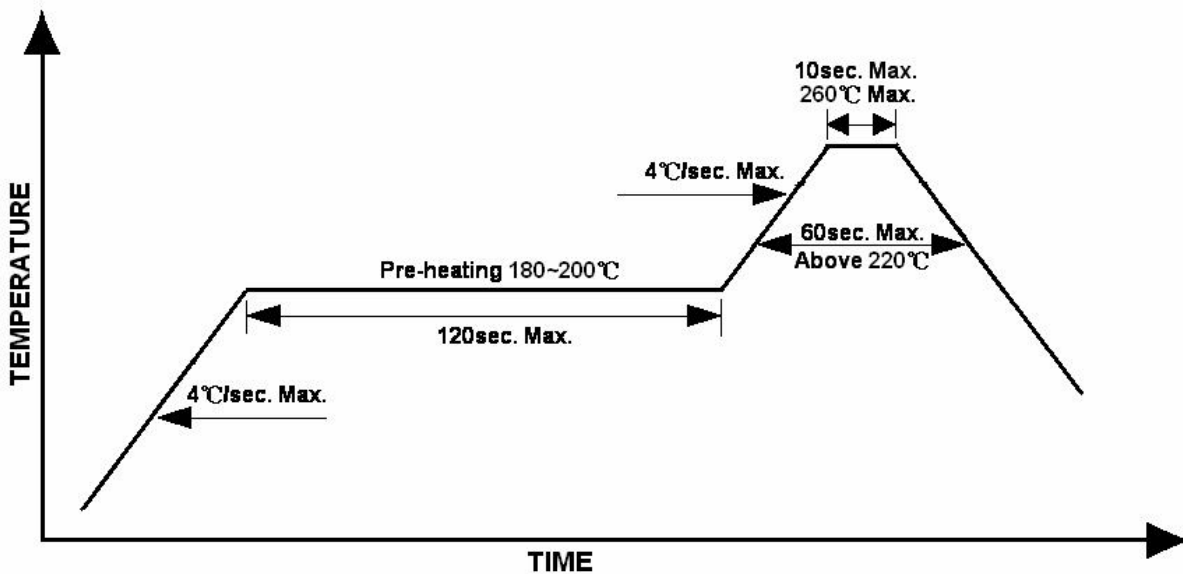

- ◆ Recommend tin glue specifications:
Melting temperature: 178~192 °C
- ◆ Never take next process until the component is cooled down to room temperature after reflow.
- ◆ The recommended reflow soldering profile (measuring on the surface of the LED resin) is following:

Lead Solder

Official Product	HT Part No. HT-261USD/UYG	Your Part No.	Data Sheet No.

Specifications are subject to changes for improvement without advance notice. Proprietary data, drawings, and company confidential all rights reserved.		Jun-07, 2006	Version of 1.0 Page 11/13

Lead-free Solder

Cleaning

The conditions of cleaning after soldering:

An alcohol-based solvent such as isopropyl alcohol (IPA) is recommended.

Temperature×Time: $50^{\circ}\text{C}\times 30\text{sec}$, or $30^{\circ}\text{C}\times 3\text{min}$

Ultra sonic cleaning: 15W/ bath; Bath volume: 1liter max.

Curing: 100°C max, 3min

Do not contact with component on the assembly board.

Cautions of Pick and Place

It should be avoided to load stress on the resin during high temperature.

Avoid rubbing or scraping the resin by any object.

Electric-static may cause damage to the component. Please confirm that the equipment grounding well. Using an ionizer fan is recommended.
